

**Patio roofs from Griesser.
Vetrazza**

Vetrazza

reddot design award
winner 2009

The best protection you can get outdoors.

Vetrazza

The patio roof can be rapidly transformed into a glass oasis thanks to the lateral glass elements. Lush greenery as far as the eye can see combined with perfect protection from the wind and other weather elements – it's a pure, natural way of life. When the system is closed, you can see right through the all-glass system without having to adjust a single profile. And when the weather's nice, all you have to do is slide out the glass side panels.

All-glass sliding rotary system

This glazing system allows you to first slide out and subsequently retract the individual glass panels on both sides.

All-glass sliding system

This glazing system allows you to slide apart the individual glass panes with a parallel rail guide.

(available from spring 2010)

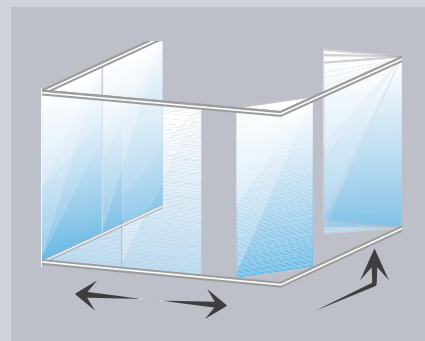

Vetrazza dimensions

min. width	2000 mm
max. width	6000 mm
min. depth	1000 mm
max. depth	4000 mm

Other dimensions on request. Due to the different versions and snow loads, the effective limit dimensions, number of pillars and shelter incline should be defined for the situation in question.

Slide out and retract the glass elements on both sides.

All-glass sliding rotary system

A great system for pleasant solar shading.

Sottezza underlay awning

The Sottezza awning adds the solar shading factor to the Vetrazza system. The roof and solar shading system harmoniously blend into one.

Fabric collections for Sottezza

- Acrylic materials from the Collection Moments
- Gauzes from the Collections Soltis 86 and Soltis 92

Version Lux Design

The Lux versions also provide lighting for the seating area for long, pleasant summer evenings so you can spend time outdoors with your family and friends. The Lux Design light bar is fitted to the roof girders of the Vetrazza system.

Fitted WGM sun room awning

If air cannot circulate sufficiently below the patio roof, we would recommend a fitted sun room awning. This ensures a pleasant temperature below the patio roof.

Fabric collections for WGM

- Acrylic materials from the Collection Moments
- Gauzes from the Collections Soltis 86 and Soltis 92

Sottezza underlay awning

Light bar Lux Design

All-round privacy.

VertiTex vertical awning

With VertiTex, the vertical awning, you can lend your seating area an air of undisturbed tranquility.

Fabric collections for VertiTex

- Gauzes from the Collections Soltis 86 and Soltis 92
- Acrylic materials from the Collection Moments (9 designs to choose from)

VertiTex dimensions

min. width	600 mm
max. width	6000 mm
min. height	500 mm
max. height	2400 mm

VertiTex vertical awning

The right awning fabric to suit customers' every whim.

Collection Moments

The Griesser acrylic fabrics fit in perfectly with the latest color trends and are divided into eight color worlds. Customers will always find the right awning fabric to suit their every whim. All materials in the Moments Collection, developed in collaboration with the traditional Italian cloth manufacturer Parà, use the latest nanotechnology to produce dirt- and water-repellent characteristics. As well as creating a good mood, the sun also however emits dangerous UV rays. Griesser only uses materials which provide an optimum protection of UPF 30+.

Collection Soltis

The Soltis Collection also presents a wide range of color shades, developed by French cloth manufacturer Ferrari. The gauzes provide the necessary sun protection while allowing users to see through them.

The automatic choice.

Connecting your awning to a control system guarantees you maximum convenience.

With the radio-controlled Griesser Remoto® hand-held transmitter, you can operate your awning from the comfort of your deck chair. There's a good reason why quality comes automatically to Griesser blinds and shutters.

Collection Soltis

Design description

Vetrazza

Patio roof without thermal separation. Profiles made from extruded aluminum. The rainwater drains down through the pillars. Roof incline ranges between 5 and 15 degrees (standard) and 15 and 45 degrees (depending on version). Roofing with 12 mm laminated sheet glass. Lateral glass elements with 8/10 mm toughened safety glass, top and bottom with glass support profiles.

Lux Design light bar

The Lux Design light bar is fitted to the roof girders of the Vetrazza system.

Sottezza/Sottezza Lux

Transport profile, front bar and box profile made from extruded aluminum. Transport profile 72 x 38 mm, with integrated tensioning system for optimum fabric tension. Fabric spindle made from galvanized sheet steel.

The Sottezza Lux light bar is fitted along the wall to match the Sottezza awning.

WGM

Transport profile, front bar and box profile made from extruded aluminum. Transport profile 52 x 58 mm, double transport profile 94 x 58 mm, with integrated tensioning system for optimum fabric tension. Fabric spindle made from galvanized sheet steel.

VertiTex

Front bar and box profile made from extruded aluminum.

Colors

Basic

Aluminum (RAL 9006/VSR 140) or white (RAL 9016).

GriColors (for an additional charge)

The GriColors range includes 100 color shades in four collections, Glass & Stone, Sun & Fire, Water & Moss and Earth & Wood – from cool white and sunny red to natural blue and earthy brown.

Fabric collections

Collection Moments

Fabric made from 100% acrylic fibers, according to collection available.

Collection Soltis 86/92 (for an additional charge)

Gauzefabric made from highly tear-resistant polyester, according to collection available.

Planning tips and operating instructions

- The solar shading systems should be retracted if it is windy.
- The systems must not be operated if there is a risk of ice.
- The systems must be accessible for maintenance work.
- Observe the VSR data sheets.
